COMS 2010 - Call for Abstracts

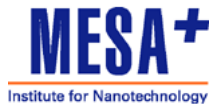

About COMS:

COMS brings together leaders from all over the world and every sector of industry. From high tech companies, national labs, regional development and government agencies, investment and consulting groups, market researchers, educators and students; all sharing, learning and creating partnerships in an open interactive setting. This is a powerful environment focused on accelerating commercialization activity among established and emerging micro and nano businesses.

Topics:

- | | |
|--|--|
| Clean Tech | Foundries |
| Investment and funding in MNT | Micro-Nano Manufacturing |
| Sensors and Sensor Systems | Investment and funding in MNT |
| Printable Nano Electronics | Cost Modeling |
| HARMST/LIGA | MNT for Security & Defense |
| 3-D measurement Metrology | Optics, Photonics, Lasers |
| MNT - Aerospace and UAV | Bio-Nanoconvergence |
| Transportation | Equipment and Processes |
| Business Methods and IP Strategies | Cost Modeling-Tear Down Analysis |
| Small Tech and Energy | Small Tech & Energy Production - Solar |
| Storage and Batteries | MNT and Green Cities and Tech Parks |
| Education and Workforce Development | Industry, Government and Academic Collaboration Models |
| Emerging Applications, 3-D Integration, and Packaging | Production: Biofuels |
| Nano and Metals, Minerals, and Materials | Small Tech and Energy: established Fuels |
